

Manan Asim

AI AUTOMATION & SYSTEMS
BUILDER
NO-CODE / LOW-CODE | API
INTEGRATIONS

CONTACT

- Lahore, Pakistan
- +92 300 6562793
- manansama17@gmail.com
- linkedin.com/in/mananasim

AUTOMATION & SYSTEMS

- Workflow Automation (n8n, Zapier)
- API Integrations (REST APIs, Webhooks)
- CRM & DB Sync (Zendesk, GoHighLevel)

AI & TOOLS

- Prompt Engineering
- OpenAI / ChatGPT / Claude
- AI Development (Antigravity)

TECHNICAL FOUNDATIONS

- Python (Basic)
- JavaScript (Basic)
- JSON Handling

PROFESSIONAL SUMMARY

Systems Builder specializing in end-to-end automation pipelines and integrating AI into business workflows. Proven systems thinker and fast executor capable of rapidly translating business requirements into scalable, AI-enabled solutions.

Highly proficient in reading documentation independently, mastering tools seamlessly, and leveraging APIs alongside no-code platforms to eliminate manual constraints and drive tangible systemic value.

PROJECTS & EXPERIENCE

AI Lead-to-Conversion Automation System

2026

End-to-End Workflow Automation

- Built an automated pipeline to capture, qualify, and respond to inbound leads using AI.
- Integrated lead forms with Airtable and Google Sheets, triggering real-time workflows via automation tools.
- Used OpenAI (ChatGPT API) to classify inbound lead intent and generate personalized responses instantly.
- Automated email and WhatsApp responses alongside internal notifications to aggressively reduce manual follow-ups.
- Connected multiple isolated services seamlessly utilizing APIs, webhooks, and scalable no-code platforms.

SupportOS: Automated Ticket Resolution

2026

Full-Stack AI Application Prototype

- Built a live SaaS simulation using modern AI-assisted coding environments (Cursor) showcasing intelligent issue tracking and triage.
- Implemented AI reasoning models to automate initial responses and coordinate async communication between mock end-users and internal support.

SahulatHub — MVP Platform Architecture

2026

System Integration & Webhooks

- Designed data architectures that integrate multiple marketplace services alongside a custom API layer.
- Coordinated back-end background jobs and database migrations (PostgreSQL) ensuring robust data consistency.
- Delivered rapid MVP iterations utilizing AI-assisted generation tools to drastically cut development time without sacrificing reliability.
- Resolved deployment blockers efficiently by parsing complex system documentation independently.

EDUCATION

BS Computer Science

University of Management & Technology (UMT), Lahore

2022 – 2026

CERTIFICATIONS

- DigiSkills — Communication & Soft Skills
- Meta Frontend Developer Professional Certificate
- NAVTTC — Advanced Web Development
